THE SALV LAKE

Very 1 Nov. 1. 105′. Taid on increase of the Cutton Science of the Cutton

protection of the protection of the present situation calls for legislation which will be prompt, durable and liberal.

The part which American merchant vessels and their scamen performed in the war with Spain, demonstrates that this service, furnishing both pickets and the second line of defense, is a national necessity, and should be encouraged in every constitutional way. Details and methods for the accomplishment of this purpose are discussed in the report of the secretary of the treasury, to which the attention of congress is respectfully invited.

In my last annual message I recommonded that the congress authorize the appointment of a committee for the purpose of making systematic investigations with reference to the cause and prevention of yellow fever. This matter has acquired an increased importance as a result of the military occupation of the Island of Cuba and the commercial intercourse between this band and the United States, which we have every reason to expect. The sanitary problems connected with our relations with the Island of Cuba and the acquisition of Puerto Rico, are no less important than those relating to finance, commerce and administration. It is my carnest desire that these problems may be connected by competent experts, and that everything may be done which the most recent advances in sanitary science can offer for the protection of the health of our citizens who are exposed to the dangers of infection, from the important of yellow fever. I, therefore, renew my recommendation that the autherity of congress may be given and a suitable apprepriation made to provide for a committee of experts to be appointed for the purpose indicated.

FIVE CIVILIZED TRIBES.

The special attention of the congress is called to that part of the report of the secretary of the interior in relation to the five civilized tribes. It is noteworthy that the general condition of the five civilized tribes. It is noteworthy that the general condition of the Indians shows marked progress. But one outbreak of a zerious character occurred during the year, and that among the Chippewa Indians of Minnesota, which, happily, has been suppressed.

While it has not yet been practicable to enforce all the provisions of the act of June 28, 1818, "for the protection of the people of the Indian Territory, and for other purposes," it is having a salutary effect upon the nations composing the five tribes. The Dawes commission reports that the most gratifying results and greater advance toward the attainment of the objects of the government have been secured in the past year than in any previous year. It cannot too strongly endorse the recommendation of the commission and of the secretary of the interior for the necessity of providing for the education of the \$3.000 white children resident in the Indian Territory.

White's Cream Vermifuge

White's Cream Vermifuge is the one worm remedy that does every pessible good without the possiblity of harm. It is a purely vegetable preparation that cannot fail to expel worms. If your child eats well, but fails to grow, if it is dark under the eyes, if it is freeful or if it sleeps poorly, the chances are that the worms are sapping its vitality, retarding its growth and endangering its life. You can use Cream Vermifuge with absolute certainty of results. Large bottles, small dose. Price, Events.
